

DRAFT
NIST Security Working Group (WG) Agenda

June 29, 2011

Time: 2:00pm ET

Duration: 1 hour.

USA Toll Free Number: 866-819-5964

Passcode: 5576521

We have received some write-ups from volunteers for:

- 3.2 Lack of Cloud Audit Assurance and Log Sensitivity Management
- 3.7 Need to Assess Trustworthiness of Cloud Operators
- 4.1 Lack of Visibility for Customer
- 4.2 Lack of Control for Customer
- 4.4 Risk of Account Hijack
- 4.6 Risk from Multi-tenancy
- 4.7 Cloud based Denial of Service

The purpose of this meeting is to drill down on the above impediments, focusing on their importance, mitigations and maturity, identify how to make the write-ups more comprehensive, and establish dates on when the more comprehensive versions will be drafted.

Goal: Mitigate security impediments that may prevent adoption of cloud computing by Federal agencies.

Main Deliverable: A document, the "Cloud Computing Security Impediments and Mitigations List". The document will contain a prioritized list of security impediments and, for each impediment, either a pointer to work that mitigates the impediment, or a description of approaches for mitigation.

Deliverables for other WGs: Security sections for the Reference Architecture document, the Business Use Cases, and the Standards WG roadmap document.

Deadlines for All Deliverables:

initial draft in June, 2011

new versions approximately every 2 weeks as appropriate

Sep. 30, 2011 - final draft
